

quickest way. Because the learners just concentrate on learning of English and learners know that anything doesn't prevent them from learning English during the period of stay in such camps. In such camps, the learners have a big advantage. They can see their native teacher constantly they can ask them questions, they can speak to them. In a different way, when the learner has a lesson with the private teacher, he just stays with him for one hour instead of four hours in the camp. Sometimes the private teacher cannot meet the learner at the weekend (Saturday or Sunday), because he is busy and he has to appoint other day of their meeting (from Monday to Friday) that cannot be suitable for the learner. One should point that camps of learning of English can attract a lot of people from Ukraine but to stay there for the learner costs a lot of money. Not every learner can spend a big some of money for the period of stay in such camps. Another problem can exist for the learner - ( after stay in such a camp, a learner will have to wait for other possibility of visiting such camp the next year). He will have to wait for nine months. And it is a big period of time of expectation.

**Conclusions.** Every single person would choose such opportunity of visiting and staying in English camps during summertime. Because the way of mastering of English in such camp affects the learner very much. Learning of English of four hours is the best way of learning of English.
