yokishor603@gmail.com

Introduction. Idioms are exactly those constructions that adorn the language, make it bright and unique. But before using idioms, you need to understand clearly their meanings. These constructions are quite common in everyday speech of students. Therefore, student-related idioms in English have been scrutinized.

Aim. The aim of the research is to analyze the material in the target field and identify the most common student-related idioms.

Materials and methods. The material from English explanatory dictionary, educational student literature and youth movies has been analyzed. The analysis of educational materials has been used.

Results and discussion. Thus, an idiom is a stable linguistic unit that has a certain specific meaning, which has nothing to do with the content of its individual elements. They should not be taken literally. Thanks to them, the language becomes more lively and acquires new shades. Sentences with student-related idioms in English can be heard in youth songs, movies, in roles on YouTube.

Therefore, the most common English student-related idioms have been chosen.

1. Ace a test- pass the test perfectly
2. Bone up on- cram
3. Burn the midnight oil - to stay up late
4. Come up trumps- unexpectedly successfully cope
5. Dead cert- an indisputable fact
6. Draw a blank- flew out of my head
7. Hit the books - sit down for training
8. Be in a brown study- think deeply
9. Keep your nose to the grindstone - to work tirelessly
10. Knuckle down- get to work
11. Make a pig's ear of –to constipation
12. Moment of truth- decisive moment.

Conclusions. Studying idioms is a very good way to raise your level of English, and make our speech more interesting and full.

TRANSLATION OF MEDICAL TERMS IN SCIENTIFIC ENGLISH MEDICAL TEXT
